

**Program (Major, Minor, Core): Neuroscience**

**Department: Biology and Psychology**

**College/School: Arts & Sciences**

**Person(s) Responsible for Implementing the Plan: Dr. Tony Buchanan, Dr. Judith Og(h)-TJ0 Tc 0 Tw 2290 Td( )TjEMC /Artifact #MCID 3**

**shared with faculty. Adjustments will be made in the curriculum and/or the assessment process, as needed with particular emphasis on NER 3400/3500 and elective courses.**

--	--	--	--

*2. Students will be able to synthesize information to formulate hypotheses, design experiments and engage in scientific research.*

NEUR 3550: Neuroscience Lab  
Senior survey

A rubric will be used to assess student performance on these aspects of NEUR 3550 (D). Students will be asked for self-assessment on a senior survey and which courses were most beneficial (I).

Assessment data will be shared with faculty. Adjustments will be made in the curriculum and/or the assessment process, as needed.

---

*Students will be able to synthesize information to formulate hypotheses, design and conduct scientific experiments*

---

*to communicate neuroscientific information in a clear, reasoned manner, both verbally and in writing*

*Students will be able*

---

**2. Please explain how these assessment efforts are coordinated with Madrid (courses and/or program)?**
